NIH LIBRARY
TRANSLATIONS INDEX
SUPPLEMENT I
1964

DEPARTMENT OF HEALTH, EDUCATION AND WELFARE
Public Health Service

PREFACE

With a few exceptions, the items included in this supplement to "NIH Library Translations Index, 1954-1963" were translated by or for the Translating Unit, Readers Services Section, National Institutes of Health Library during 1964 or were received as gifts from other organizations during the year.

In order to make this supplement more useful, we have included a general subject index of the translations and a list of the journal-title abbreviations used. The bibliographic information for some items received from other organizations could not be verified. Consequently, abbreviations are listed only as they appear on these translations.

Persons employed by any agency of the Department of Health, Education and Welfare may obtain a retention copy of these translations from the address shown below by citing the serial number appearing at the end of each entry, e.g. 2-2-64. The translations are available to others only on an interlibrary loan basis. They may be borrowed for a period of two weeks through established libraries. ALA Interlibrary loan forms are to be used by the borrowing library, and only the serial number appearing at the end of each entry, e.g. 2-2-64, rather than the entire entry, need be cited. All requests should be addressed to:
